

The Covid-19 pandemic affects all aspects of our lives, worldwide. We hope that you, your colleagues and your relatives are well and braving the Corona crisis like us!

How does the corona virus affect deliveries from our production facilities in Switzerland?

From today's perspective, the supply of raw materials and basic materials to our production is secured. This means that we can continue to guarantee all our customers the security of supply and on-time delivery to which they are accustomed.

From today's perspective, there are no negative effects on safematic deliveries.

Thanks to safety stocks for the most important auxiliaries and raw materials as well as base materials, we can still offer our customers very short delivery times.

Preventive measures at safematic

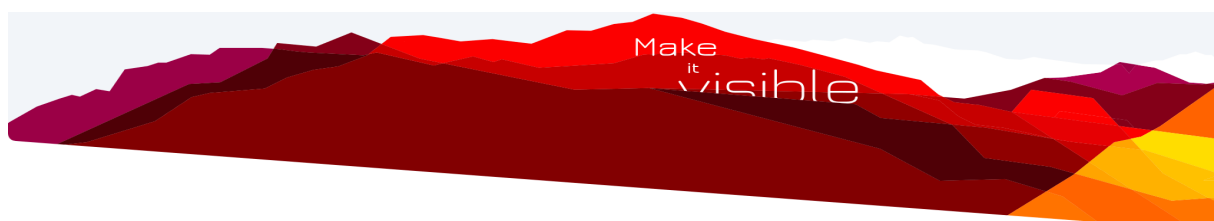

Extended protective measures and rules of conduct were also introduced. In particular, compliance with hygiene regulations is consistently monitored and ensured. With all these measures we can continue to guarantee you the highest possible security of supply.

For further questions and information, please contact us. We will do our utmost to serve you in the best possible way, even under the given circumstances.

The entire safematic team wishes you and your family's good health and thanks you for the good cooperation during this extraordinary time.

With kind regards

Your safematic team
